Welcome

to our American Science & Surplus catalog. Here you will find a unique mix of industrial, military and educational items, with an emphasis on science and education. We supply a wide range of unusual and hard-to-find items (some say bizarre stuff) to the hobbyist, tinkerer, artist, experimenter, home educator, do-it-yourselfer, and bargain hunter. Our items are great gifts, inexpensive supplies, and an endless reason for a giggle or a "Gee whiz!" We try to be scrupulously honest in presenting whatever we know about what we have, and always take it back, no questions asked, if the customer isn't satisfied with it. Please remember that we offer many more items than will fit on these pages. You can both peruse and purchase every item we have at our website: www.sci-plus.com. Thank you for taking the time to browse our catalog. We appreciate your business.

Frequently Asked Questions

What is surplus?

We buy closeouts, inventory overruns, mis-manufactures, and items whose time has not come. We can usually acquire these items on a one-time-only basis. When a surplus item is gone, it is gone. So if you see something you love, best get it now since we may not have it tomorrow. Our website is frequently updated with our inventory. If you see an item in our catalog, but cannot find it online, it means we have sold out of that item. If our stock of the item you have ordered is exhausted we will refund that portion of your remittance. When we can't find surplus, we may carry regular merchandise which we think those interested in learning and tinkering will find appealing, but only if we feel it is good quality at a fair price.

Can I return items?

Yes. We accept all returns without question and will either refund your purchase price or send you a replacement, as you chose. Returns must be made within 30 days of purchase. For complete details, please check the order form bound in the center of this catalog.

What forms of payment do you accept?

We accept Visa, MasterCard, Discover, checks and money orders. We are sorry to report that we cannot accept CODs, cash, stamps or gold. **If paying by check, please be aware that you are authorizing American Science & Surplus to use the information on your check to make a one-time electronic debit to your checking account. This electronic debit will be for the amount indicated on your check. If you do not have sufficient funds in your account, a returned check fee may be debited from your account. If you have any questions, or choose not to have your check converted into an electronic item, please contact American Science & Surplus at (888) 724-7587.**

Do you have a minimum order requirement?

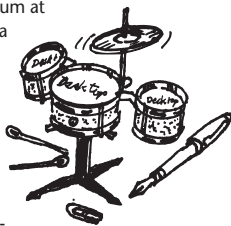

We regret that the costs of doing business preclude us from processing orders of less than \$10.00 merchandise value (exclusive of shipping and handling). We will return orders of less than \$10.00 merchandise value.

Additional information can be found on the order form bound in the middle of this catalog.

Fully Articulated!

We saw articulated, foot-tall wooden artists' mannequins just like these in a Paris gallery window last year, with all their little articulated parts painted in different high-gloss colors. Very harlequinesque, and many, many Euros. Our 12" mannequins are in unfinished wood, but if you've got paint you could get all avant rive-gauche and paint your own. Not that sensitive? Paint your local NFL uniforms on 'em. In a pinch, you could use them as intended, as artist's models, but where's the fun in that?

Green Laser Par Excellence!

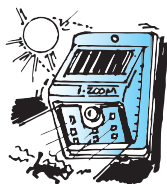

Da Mare could use this to point out cracks in the infrastructure at Wrigley Field. You, having a forgiving nature, will resist the urge to point out cracks in da mayor's infrastructure. You will, of course, use it to point out chimney cracks to the tuck-pointer, a cracked limb to the tree-trimmer, and the crack in your profit picture during a slide presentation. You can do all that and much, much more with the bright light from this 5mW green laser pointer. It's an unbelievable tool. If you need a laser pointer that seems to go on forever and is so strong that you can actually see the beam in the dark, it will be the best low-cost investment you ever made. Or the coolest high-end toy. The 532nm Class IIIa light is 5-5/8" long x 1/2" dia, with (2) "AAA" batteries (included), a momentary-on switch, pocket clip, and case. An absolute necessity for construction, surveying, warehousing, inspection and other large sites. And for playing in the dark.

A Multifunctional Adjustable?

This rotating LED pedestal puts a little extra pizzazz in awards, displays, tchotchkes or cocktails. The package calls it the "ISO9001 Multifunctional Adjustable," and a "Crystal Rotary Slide Show" which we call a language problem, but it's still pretty slick. This black 4-1/2" dia x 1-3/4" tall display pedestal with a mirrored top has oscillating green, red, yellow and blue LEDs at the center. The whole shebang will turn at 1 rpm or sit still if you can't stand the excitement. Powered by (3) "AA" batteries that you buy, or by the included wall adapter.

Time To Freak Out Mom

Faux full-sleeve tattoos at a tiny fraction of the cost of the real thing, not to mention the easy, two-second removal. Our temp tats are a stretchy 16" long and 3-1/4" wide in lightweight Lycra® and are very realistic at even close range. We'll pick one (although we recommend getting two for obvious reasons) from a vast array of patterns and themes, all guaranteed to drop Mom onto the fainting couch at first sight. They end at the wrist, but feel free to ink LOVE and AS&S on your knuckles with one of our markers.

45348 Faux Tattoo Sleeves \$2.95/each

Designer Millinery

You won't see these hunter-orange nylon winter hats, lined with genuine ersatz fur (no ersatzes were harmed, etc.) and complete with ear flaps and a chin strap, in your local haberdashery. Marked one size fits all, they're approx a 7-3/8 but sorta squooshy-stretchy, so a lot of noggins will fit. There's a big "Longleaf Camo™" logo, plus antlers, on the back, but you can't see that in your mirror.

43584 Big Orange Hat \$8.75/each

Who Knows Where The Goo Goes...

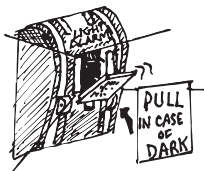

And who cares, as long as it's gone. This 3-oz bottle of Goo Gone® is made for uses all around your house, office and automobiles. It removes goo from adhesives of all sorts, plus bird poop and tree sap.

Pull This

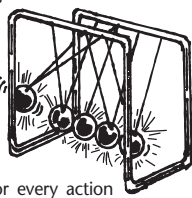

Kids who pulled these fire alarms in school got sent to the office (unless there was an actual fire, of course), but now you can pull the lever all you want on this Fire Alarm LED light. Super-bright and super-handly for closets, garages and the like, or just as an emergency light. Measures 4-3/8" x 3" x 1-1/4" with a pair of bright COB LED light strips. Mounts via two screw holes, or with the included double-sided tape. Runs on (3) "AAA" batteries, included.

45247 Fire Alarm Light \$4.50/each

Isaac Newton In The Dark

OK, glass with blue LEDs, but still. This is a Newton's Cradle, always seen with steel ball bearings, but this time with frosted glass balls glowing a stunning bright blue while they swing on wires and prove Newton's Third Law, and if you have to look that up you shouldn't be reading this catalog in the first place. Just kidding—it says that for every action there is an equal and opposite reaction. You knew that. Newton would have ordered multiples of this beauty for all of his friends. Measures 7-3/4" tall on a 7" x 6" base with the standard (5) globes. You add (6) "AA" batteries for the glow.

95725 Swinging Blue Globes \$39.95/each

92293 "AA" Alk Batteries \$1.95/pkg(4)

Clever Idea #763

This idea is for the birds. Literally. A green plastic perch, dish, and dispenser that you can screw onto an inverted plastic pop bottle to convert it into a bird feeder. Obviously, the bottle should have been emptied of pop and filled with seed. One of those "100 things to do with old coat hangers" ideas that really works!! Complete with instructions and bail to hang the completed feeder.

89308 Wild Bird Feeder \$2.95/each

Tannenmobile

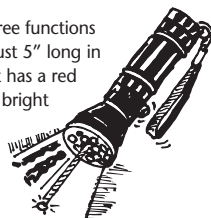

Save the pine forests and hang this acrylic Christmas tree mobile instead of dragging a dead Balsam or Fraser into your living room. Five nesting pieces in varying shades of pine-like green, with the outside spinner measuring 12" tall x 12-1/2" at the bottom branches. Even has a gold star at the top. We think it's what Alexander Calder would have hung every December if he'd thought of it.

43323 Xmas Tree Mobile \$2.95/each

Stumpy Threerfer

This little light of ours has three functions and still fits in your pocket. Just 5" long in a black aluminum housing, it has a red laser, a 5-LED UV light and a bright white 10-LED standard flashlight. You add a trio of "AAA" batteries, thoughtfully linked below, and Bob's your uncle, or at least your brother-in-law.

Is That A UV Light In Your Pocket?

Yes it is. As a matter of fact, it's a pocket UV flashlight for making sure you can get back into the dance. Has (9) 365nm UV LEDs and measures 3-3/4" long x 1-3/16" dia with a black knurled housing and a 5" wrist strap. Also good for checking currency, looking for radiator or trans fluid leaks, mineral identification, and spotting scorpions in the dark. You add a trio of "AAA" batteries and the scorpions.

92294 "AAA" Alk Batteries \$1.95/pkg(4)

The Butt Bucket

For when you just can't drag yours around anymore? No, for out-of-sight cigarette butt and ash disposal. This mini-bucket, sans handle, is a 3-1/4" dia x 3-7/8" tall black-composition ashtray that can sit on a desk or table, or fit neatly into a car's cup holder. Its removable lid has (3) slots to hold lit cigarettes and a small, cigarette-diameter hole so the butts slide out of sight and go out for lack of oxygen. Cuts down ambient dead-butt odors, too.

93044 Butt Bucket \$1.95/each

Drinking Bird

You're buying the drinks and this wacky, yet debonair, bird with a top hat and plastic base (7" tall OA) can't get his fill of water. Get him started, and he dips his beak into your glass repeatedly. How? Fluid inside his glass body condenses from the evaporative cooling of the water off the bird's beak, making it top heavy and dunking it back into the water. The condensate rejoins the liquid pool in the bird's bulb, and he tips up again. Process continues indefinitely. It works, but it's not any more than moderately well made, and not any more than moderately priced. **WARNING!** The fluid and dye inside the bird can permanently stain, and the bird's glass body can easily be broken. Children are fascinated by the bobbing bird, and the educational possibilities are great. But they should watch him, not fondle him!! Manufacturer warning states this item is not intended for children 8 and under. **WARNING:** CHOKING HAZARD-Small Parts. Not for children under 3 yrs.

Who's Mug

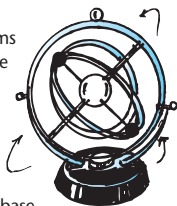

Yes, it is. Note that this ceramic Dr. Who mug is marked 11 oz but holds 9 oz, probably because of time travel. Features the Matt Smith Doctor, who's the 11th or 12th, depending on when you're time-traveling. The mug measures 3-3/4" tall x 3-1/8" dia with a handle, and is dishwasher and microwave safe thanks, probably once again, to time travel. Licensed by the BBC, but made in the USA.

Desktop Atom

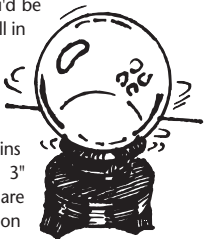

Yes, your desktop is made of atoms (you, too) but this is a 7" dia chrome and black model of an atomic structure (Boronish, Paul says) that keeps on turning via the magic of electromagnetics, at least until the 9V battery you put in it wears out. Stands approx 9" tall on its base. Ignore that "perpetual motion" on the box, unless you have a perpetual battery. Minimal assembly required, but a maximum person like you won't have a problem with it.

Radiometer

Another oldie but goodie. 5" high evacuated clear glass stand 3" in diameter at the top. A four bladed vane is balanced on a needle inside the sphere. Because opposite surfaces of the vanes are black and white, incident radiant energy is absorbed or reflected to a different degree. The result is a spinning vane. The brighter the light, the faster it spins. Simple, but compelling. Brief explanatory instruction sheet included.

Mirage Maker

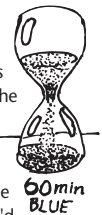

Absolutely incredible device! A precision optical instrument that creates three dimensional images of objects of your choice where there is nothing. Drop pennies, keys or similar small objects (your sister won't fit) into the 2-3/8" dia opening of this 9" dia x 3" high flying saucer shaped disc, and a perfect image of the object will appear floating above it. The image is so real friends will try to grasp it, but their fingers will close on thin air! Use it as a high tech centerpiece with a flower as the object! A booklet (included) explains the magic. New coating provides protection for the mirror surfaces. Highly recommended. **WARNING:** CHOKING HAZARD-Small Parts. Not for children under 3 yrs.

Time Is Running Out...

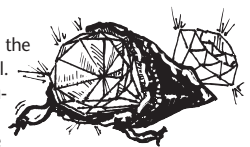

Like the days of our lives, the sand in these large glass timers is running out. You pick the hour-glass in a double teardrop shape with blue sand, which takes approx an hour to empty (nothing was certain in the pre-digital age, my friend), and stands 11-1/4" tall x 4" dia; or the three-chamber half-hour glass that measures 9" tall x 3-3/16" top and bottom, with red sand. Keep one on your desk and no one can accuse you of being a clock-watcher, or use it anywhere you'd rather not hear a beep.

Ginormous Gem

Bigger than a baseball across the top, this is one ginormous jewel. You pick a clear or deep-translucent-blue, 24% lead crystal, cut-glass gem. It's 3-1/8" dia at the top, tapering to point 2-1/8" deep. Could be mounted in a stunning, but really, really, really big engagement ring.

Measure 10" from index fingertip to wrist, and have a small hole at the top of the wrist for adding a hook or loop to hang them by. Also dandy for opening stubborn jars. The Tasteful Toilet Bowl

We've all seen coffee cups designed to look like toilet bowls, but this, we are proud to say, is easily the most dignified, tasteful toilet-bowl in the world. The vegetables will never have a chance. Dishwasher safe and it skwooshes down to just 2-3/4" tall for storage.

Soft Touch

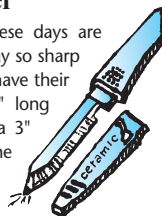

And easy to store. One of the better pick-up tools we've seen. Folds to just over 16" to store, but locks open at 30" with spring steel arms on an aluminum frame. It has soft, suction-cup-shaped grabbers and big, locking pistol grip. Pretty good gripping capacity too-maybe to 10 lbs or so. Get one for Mom, because at her age she can't reach the things she used to. And then get another one for yourself, because you'll be Mom's age before you know it.

Magic Rayon Tablet

Looks like an antacid tablet, a white disc 13/16" dia x 3/8" thick, but drop it in water and the rayon instantly expands into a 9" x 13" reusable wipe. Can you say handy? No mother should ever leave the house without a few in her purse and no glove compartment is complete without a handful.

Oddly Compelling Timer

CJ, our House Polymath, and a guy not easily compelled, called this thing "oddly compelling," and we agree, because were were oddly compelled. It's your basic hourglass with blue fluid inside that foams and bubbles when you turn the whole thing over, and there's something about the bubbles. Measures 6-3/8" tall x 2-5/8" dia and the time it measures depends on how much you shake it, but it's always compelling.

Measures 15" x 11" x 5-5/8" when open but collapses down to just 1-1/2" high for storage. Could also be a very nostalgic shopping basket, dandy for collecting garden vegetables. Hose-off-able and pretty much niftiness itself. Also great for camping.

95983 Silicone Basket \$8.50/each

The Accordion Bucket

Not to be confused with the bucket accordion, the least popular instrument of all time, this is a collapsible bucket, made of silicone with a hard plastic rim. Holds 1-1/3 gallons and stands 7-3/4" tall x 8-3/4" ID at the top, but collapses (accordions) down to less than 2" tall, including the folding handle. Has a little hanging tab at on the lip. Ouch!

Looks like a cheap kid-sized tennis racket, but brother, this ain't for the kids. It's actually a fine way for adults to work on their upper-body strength and kill bugs at the same time. 18" long, with a 6" wide paddle lined with metal grid. A coil in the handle sends high voltage through the paddle when a button is pushed; hit a bug with it and the bug will bug you no more. But despite the manufacturer's claims that it's safe for people, Scott reports that flesh-paddle contact delivers a nasty shock, nasty enough to say "Keep this away from kids!" Doll Him Up

This plain white muslin doll is 13" tall, with 8" of skinny legs. Wires inside the stuffed arms and legs make him easily posable. Him? Well, it looks himish, but it's naked and decidedly gender-free. It also looks like there's an Edward Gorey character trying to get out, but that's just our impression. A bunch of these painted in dancing costumes, or as frogs, or acrobats, on a mantel would make a mighty pretty scene, we think.

Me, Me, Me, Me, Mee

You can start with our single aluminum tuning fork, 2-tined and 7-1/2" long. It vibrates at 256 hz, and is labeled "C". Or you can order the set that has (8) forks and a mallet with a rubber-tipped plastic head. The forks are labeled low-C to high-C and come in a fitted, latched wooden box. Unfortunately, C.J., who has perfect pitch, tells us that his pitch is more perfect than most of the tuning forks. He also says you can file the tips, tuning them to an electronic keyboard until they're perfect – and we think there's a certain cachet to telling people you tuned the forks yourself. But they are perfect, if you're using them for things like teaching principles of sound or driving the chihuahua crazy.

Field & Forest Guide

Titled "The Field and Forest Handy Book," this volume has been justifiably in print since 1906. Written by Daniel C. "Uncle Dan" Beard, the founder of the Sons of Daniel Boone and one of the founders of the BSA, it's a compendium of eternally relevant woodland lore, from building cabins, sleds, boats, and bridges to camping in swamps. The only part we skipped was on how to cook a muskrat. (We know a place that delivers.) Loaded with illustrations. In soft cover from David Godine's Nonpareil Books; 428 pp.

How Does It Work?

Why does it do that? Develop an elemental understanding of magnetism, electromagnetism, electrochemistry, radio, thermodynamics, light and optics. Simon Quellen Field's 228-page paperback, *Gonzo Gizmos, Projects & Devices to Channel your Inner Geek* explains processes, equipment and scientific terms — and then, for starters, tells you things like how to make a rotary steam engine in 15 minutes from a soda can, a candle and a few scraps of rubber tubing. It's the favorite of our resident geeks — but not for kids unless they're working with an adult. That would be a mature adult. An insured, mature adult.

Surprise your parents with a little science at home. "Science Surprises" is a 192-page paperback in its third edition with over 100 experiments that can be done using common household goodies. OK, a couple of things might require a trip to the hardware store, but still. The science ranges from the Bernoulli principle and Stroop effect to making your own perfume and cold cream. (And remember what Shaw said: "Science never solves a problem without creating ten more," so that makes a thousand experiments.)

The well slides, of course, have a concave well to hold a drop of liquid. Our each is a package of (12) well slides, or a box of (72) standard slides with ground edges. Cover glasses are the smaller and very thin pieces of glass used as the top of the glass slide sandwich. They are often used temporarily by simply dropping them onto a drop of liquid to flatten and spread it and to minimize evaporation. More confident microscopists will cement them in place to permanently preserve a specimen. Our each is a package of (100) cover glasses 18 mm square, #1 thickness (0.13mm to 0.17mm). If you need one, you need both.

Lab Stand

Affordable, adaptable lab equipment for serious scientists with laughable budgets. The basic stand is heavy black metal 8" long x 5" wide x 1" high with a 19-1/2" x 3/8" dia support rod screwed into it. 92042 Magnets, Set of 3 \$4.25/each

A Lot Of Pull

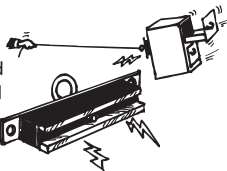

Pick up this 1-3/4" x 7/8" x 3/8" ceramic pick-up magnet while we still have it. It's in a heavy metal housing and has a stationary metal hoop, about 1/2" i.d., on top. The manufacturer tells us the magnet will grab up to 5 lbs of metal, however Pat and Magnet Testing Team #3 have repeatedly lifted 10+ lbs, so it's very strong. Especially if you're going to dangle it on the end of a cord to gather spilled nails or to fish your keys out of the lake/pond/sewer/drain!

91859 Pick-Up Magnet \$2.95/each

A Real Grabber

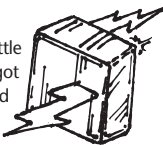

Okay, it isn't the cheapest magnet in the warehouse - but we dragged John's 165 lb filing cabinet around the dock with this 4-7/8" x 1" x 3/4" ceramic magnet, we're rating it conservatively at 100 lbs of pull, and we think it's a bargain. It has a 6" bracket with mounting holes on 5-1/2" centers, plus a 1/2" ID eye-hook bolted into the center of it. It's all set to troll the bottom of the lake next time your filing cabinet falls overboard.

91949 Pick-Up Bar Magnet \$10.95/each

Killer Magnet

Once upon a time, a copywriter put this little magnet next to his computer monitor and got really pretty, wavy, aurora-like effects. And then got a new monitor! Don't try this at home. Our shiny, silver-colored 1" x 1" x 1/2" neodymium magnet looks innocent, but is industrial strength, pulling something like 25 lbs with enough strength left over to erase all your credit cards. And wreak havoc with your monitor.

38694 Killer Magnet \$14.50/each

There's A Hole In The Magnet

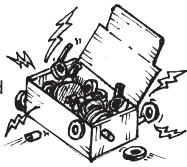

The 3/16" bore in the center of this small plated neodymium magnet just makes it easier to mount. Measures 3/4" dia x 1/4" thick with a pull of approx 7 lbs. Works great with #6 or #8 flat head screws.

95657 3/4" Bored Magnet \$2.95/each

The Magnet Grab Bag

Our grab bag is a box. The grabbers inside are about a one-pound assortment (that's a bunch) of various and sundry magnets of different sizes, probably including ceramic discs, cylinders, rings, some hollow, some solid, with a few rare-earth magnets tossed in for grins, plus a 2" square magnetic field sheet. All in all, a very attractive assortment.

41248 Box Of Magnets \$9.95/each

Sticky Bar Of Silver

This plated N45 neodymium magnet is shaped like a miniature silver ingot, measuring 1-1/2" long x 1/2" wide x 1/4" thick. Has a big hangonability quotient, which the manufacturer claims is 26 lbs of pull, meaning it's probably closer to 20 lbs. Impressive either way.

95659 Neodymium Bar Magnet \$4.85/each

The Most Beauteous Cube

Voted most likely to attract by the judges, this magnet has the relative strength of 10 men. A shiny silver 1/2" cube of neodymium magnetism, it packs approx a 15-lb pull. If our boss Pat were that strong he could lift 2,160 lbs! Besides its superpower strength, this beautiful cube also would improve the looks of your fridge or bulletin board to no end.

Not fishnet stockings, but netting for actual fish, direct from the U.S. Army (you'd think Navy, wouldn't you?) in olive drab. It's a survival thing. You get a 10-foot x 5-foot net made of 3/4" squares individually knotted from twisted cotton/nylon, so the net won't unravel if torn. Might have a slightly musty aroma (but definitely not fishy) that a little sunshine time will fix. Great for maritime-theme decoration, bible-camp plays (filled until breaking, walking-on-water background prop...) or, we suppose, fishing. And perfect if you want to go to a costume party as Poseidon.

Stretches to about 6' x 9', with openings that are 7" square, stretching to maybe a foot, and 16 carabiner-style plastic hooks. Or just hang a couple on a wall for a nice Spiderman effect.

A retired monk?

Nope—it's a decidedly non-theological surveying instrument for measuring angles in horizontal and vertical planes, although some (and we think maybe these, given the OD paint) are used by the military in meteorology and rocketry. Measures approx 7-1/2" x 5" x 4" with a plethora of moving parts: optical head that pivots up and down; focal knob calibrated from 0 to -90 and +10 to +80; horizontal and vertical adjustments with a locking lever; and a 1-5/8" dia ball with a 1/2" hole in the bottom for a mount. Fallout Shelter Sign

They're Back! Those of a certain age will remember being taught to crouch under their school desks in case of nuclear attack. Shortly thereafter, the gov't, in its infinite wisdom zoomed about the citiescape plastering black and yellow signs on buildings with basements to designate them as fallout shelters wherein it stored cans of water and radiation meters which were so insensitive that any reading could only mean the past tense of crispiness. We have a quantity of these signs, brand new in the sense that they have never been plastered, but antique in the sense that they are the Fifties originals. 10" x 14", 25 ga. galvanized steel. They have a black base coat on the front over sprayed with orange/yellow reflective paint in the familiar design rendered nearby by our faithful artist. This is a true collector's item fetching \$50 and up in antique stores! A tasteful addition to even the duller basement hangout.

Loupe And Light Glasses

Steampunk alert! Also...model and jewelry maker alert! This pair of 10X acrylic doublet loupes is mounted on black eyeglass frames and flanked by LED lights powered by (2) included CR1620 button cell batteries. These are for close work only, from 1" to 1-1/2", and can focus only one lens at a time (not both on the same object) so if you're a steampunker looking for a new accessory, plan on perching this rig on your pate or chapeau.

Mighty Bright Loupe

This 8X folding loupe in white plastic and aluminum has a pair of very bright white LEDs next to the lens. Runs on (3) button-cell batteries, included, and has a tiny wrench to help you replace them. See It Again, Sam

A Sherlock Holmes-type magnifying glass is good, but this is better. It frees your hands and throws light on the subject! This 120-volt magnifying desk lamp has a heavy 7-3/8" x 5-1/2" x 2" base with a power switch, standard lamp cord, and 11" gooseneck ending in a 5-1/4" dia shade. Under the shade is a circular fluorescent bulb and a 3-3/8" dia lens with a flip-back cover. The box says the lens is 5X, we think it's closer to 2X. Either way, it's a major improvement if you need help to examine scientific specimens, to inspect stamps or jewelry, or just to read. And we won't even talk about how your nail care is going to improve after you see your cuticles under this thing!

Sconce Of Tomorrow

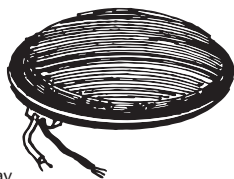

Our uber-slick, modern wall sconce is a COB LED that draws just 1W and throws white light up and down from a 3" long x 2-3/8" square hunk of brushed aluminum that's open on the ends. (Yes, could be mounted to light to the sides, and yes, it could be a ceiling mount.) Has a pair of 1-1/2" torsion springs to pull it tight to the wall from behind. Operates between 85-265 VAC, so standard house current works but the light needs to be hard-wired. Includes a driver circuit and leads. From Lumicon.

We Traffic In Lights

And the traffic lights we traffic in are the LED versions, using up a paltry 6W. You pick red, yellow or green, all brand new, 12" dia with a gasketed rubber rim. Measure 5-1/2" deep with a pair of 3-foot leads for power. Some may be color LEDs but most will have color lenses. Why so cheap? We got them from a municipality in the frozen north where they discovered too late that LEDs don't generate heat, and won't melt the snow that lands on the lenses when the cold wind blows. See what scientific ignorance leads to?

Not for children under 3 yrs.**

Hemostatic Heaven

Hemostats are the clamplike devices dangling from veins and arteries in melodramatic operating scenes. Our particular collection are Pakistani surgical-grade instruments made of magnetic stainless steel. As such we rate them pretty good, but not fantastic. Hemostats look like little pliers. The jaws are relatively fine, with rounded tips. The inside faces are lightly serrated to get a grip on tubing or body plumbing. And the handles are much longer than the jaws. Now the heavenly part. Great hobby clamps that can be worked into small areas. Fine heat sinks for electronics. Good hook extractors for trout fisherpeople. Excellent tubing clamps for flow-sensitive chemistry experiments. Sizes are approximate length.

A Little Bit Of Superiority

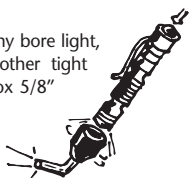

Face it: you use a new tube of super glue every time you need to fix something. Us too, so don't feel bad. Instead, buy the smallest loctite® tubes you can, which would be these, a teensy 0.03 oz each, which is still enough to glue anything. The size of these tubes means less waste, but they do have resealable caps if you want to continue to kid yourself. Our each is (3) tiny tubes.
